LIST OF CONTENTS

Volume 28B, No. 1, February 1994

E. A. Selvanathan and **Saroja Selvanathan** — 1 — The demand for transport and communication in the United Kingdom and Australia

Marat Genç — 11 — Aggregation and heterogeneity of choice sets in discrete choice models

Hai Yang, **Yasunori Iida**, and **Tsuna Sasaki** — 23 — The equilibrium-based origin–destination matrix estimation problem

J. M. Del Castillo, **P. Pintado**, and **F. G. Benitez** — 35 — The reaction time of drivers and the stability of traffic flow

Gary A. Davis — 61 — Exact local solution of the continuous network design problem via stochastic user equilibrium assignment

I — Forthcoming Papers

Volume 28B, No. 2, April 1994

Refat Barbour and **Jon D. Fricker** — 77 — Estimating an origin–destination table using a method based on shortest augmenting paths

Benedikt Mandel, **Marc Gaudry**, and **Werner Rothengatter** — 91 — Linear or nonlinear utility functions in logit models? The impact on German high speed rail demand forecasts

Dŭsan Teodorović, **Milica Kalić**, and **Goran Pavković** — 103 — The potential for using fuzzy set theory in airline network design

Hai Yang, **Sam Yagar**, **Yasunori Iida**, and **Yasuo Asakura** — 123 — An algorithm for the inflow control problem on urban freeway networks with user-optimal flows

Gang-Len Chang and **Jifeng Wu** 141 Recursive estimation of time-varying origin–destination flows from traffic counts in freeway corridors

Hai Yang, Sam Yagar, and **Yasunori Iida** 161 Traffic assignment in a congested discrete/continuous transportation system

Paolo Ferrari 175 The instability of motorway traffic

I Forthcoming Papers

Volume 28B, No. 3, June 1994

S. C. Wong 187 An alternative formulation of D'Este's trip assignment model

Patrick T. Harker and **Sungwook Hong** 197 Pricing of track time in railroad operations: An internal market approach

Hanif D. Sherali, R. Sivanandan, and **Antoine G. Hobeika** 213 A linear programming approach for synthesizing origin–destination trip tables from link traffic volumes

Jorge A. Acha-Daza and **Fred L. Hall** 235 Application of catastrophe theory to traffic flow variables

I Forthcoming Papers

Volume 28B, No. 4, August 1994

Malachy Carey and **Andrzej Kwieciński** 251 Stochastic approximation to the effects of headways on knock-on delays of trains

Carlos F. Daganzo 269 The cell transmission model: A dynamic representation of highway traffic consistent with the hydrodynamic theory

David P. Watling 289 Maximum likelihood estimation of an origin–destination matrix from a partial registration plate survey

Sam Yagar and **Bin Han** 315 A procedure for real-time signal control that considers transit interference and priority

I Forthcoming Papers

Volume 28B, No. 5, October 1994

Contents

Malachy Carey	333	A model and strategy for train pathing with choice of lines, platforms, and routes
Tommy Gärling, Mei-Po Kwan, and **Reginald G. Golledge**	355	Computational-process modelling of household activity scheduling
Se-Il Mun	365	Traffic jams and the congestion toll
Dirk Heidemann	377	Queue length and delay distributions at traffic signals
David Bernstein and **Ibrahim El Sanhouri**	391	A note on "Departure time and route choice for the morning commute"
Malachy Carey	395	Extending a train pathing model from one-way to two-way track
	I	Forthcoming Papers

Volume 28B, No. 6, December 1994

Robert Bordley	401	An overlapping choice set model of automotive price elasticities
Malachy Carey and **Andrzej Kwieciński**	409	Swapping the order of scheduled services to minimize expected costs of delays
Gunnar G. Løvås	429	Modeling and simulation of pedestrian traffic flow
Radha Chandrasekharan, Patrick S. McCarthy, and **Gordon P. Wright**	445	Structural models of brand loyalty with an application to the automobile market
Hai Yang and **Sam Yagar**	463	Traffic assignment and traffic control in general freeway-arterial corridor systems
	I	Forthcoming Papers
	VII	Volume 28 Contents and Author Index
